
OH&S POLICIES

These policies apply to crane operators, riggers, signalpersons, crane supervisors and safety support on the lift. They are not a general construction manual.

Rev 01 Effective 2026-09-01 Review 2027-09-01 Printed copy uncontrolled

The rules for crane and rigging work. Short enough to use.

Each policy is a controlled document: number, revision 01, effective 2026-09-01, owner Proven. Open a policy, put your company name, logo and signature on it, and download a PDF. The current version is the one on this site.

The set includes the OH&S policy, violence, workplace conduct, fitness for work, PPE, impairment, working alone, incident reporting, injury management, return to work, bullying and harassment, and discrimination - plus competency, training, crane operations, rigging, first aid, joint committee, contractors, occupational health, and the rest of the lifting rules.
