
NEAR-MISS REPORTING

Someone in the zone, a lost signal that almost mattered, a sling that started to cut - that is a report, not a story for later.

Working copy. Current controlled version is on this site.

WHAT COUNTS

Anything that could have injured a person, dropped a load, or contacted plant, lines or the public - and did not, this time.

SAME DAY

Report before leaving the shift. A near miss that waits until Monday is a rumour.

COMPETENCE

Reporting a near miss is competence. Hiding one is how the next crew inherits it.
