
COMPETENCY

A ticket is not competency. This program names what the person must hold for the machine, the lift and the site.

Working copy. Current controlled version is on this site.

VERIFY BEFORE THE LIFT

Qualifications, experience and practical competency are checked against the work. Expired means that person does not take the role.

FIT TO THE JOB

A mobile operator is not a tower operator by default. A structural rigger is not a plant rigger by default. The closest body is not a match.

ALREADY QUALIFIED

Workers arrive already qualified for the role. Site orientations are arranged. A missing qualification is named before the lift.
