## CRANE OPERATIONS

The chart is the law of the machine. No lift without a plan. No unclear signal.

Working copy. Current controlled version is on this site.

### CHART AND CONFIGURATION

Operators run the crane they will operate, in the configuration the chart requires. Counterweight, boom, jib, software - as written.

### GROUND AND SETUP

Outriggers, mats, level, and supporting surface as the manufacturer and the plan require. Scrap lumber is not engineering.

### STOP

Unclear signal, unknown load, wind out of plan, lines inside MAD - the crane does not come on load.
