
SJP LIBRARY

Safe Job Procedures for work the SWP cannot finish until this morning's facts are named. Flytable cycles and loading-platform installs. The SWP is the method. The SJP is the instance. Fill the sheet for this table or this deck, this floor, this serial.

Rev 01 Effective 2026-09-01 Review 2027-09-01 Printed copy uncontrolled

This lift. This site. This day. Search it.

An SJP is not a longer SWP and it is not a JHA. Do the work to the SWP. Name the hazards in the JHA. Fill this SJP with weights, pick points, sling lengths, wind number, named crew, holds and abort. If the instance contradicts the method, stop and fix one of them before the hook moves.
