ITEM	PASS	FAIL	N/A	COMMENTS
------	------	------	-----	----------

Engineered drawing revision matches this table ID				
Manufacturer cycle for this system is at the lift				
Table is typical - or corner / nontypical plan attached				
Weight and COG known (14.36)				
Four designated pick points - pins / cotters in as the OEM				
Sling lengths as the drawing - not last floor's memory				
Crane will not pull the table out of the slab				
Curb stops / kicker blocks at the edge				
Brake lines if the drawing requires them				
Fall protection at the slab edge (Part 11)				
Exclusion below and on the landing floor (14.44)				
Wind at or below the lower of crane, manufacturer, this SJP				
Radios tested - confirmation loop, both floors				
No people or loose material on the table while flying				
Pre-lift meeting immediately before this cycle
