

WHMIS + SDS

The SDS library is diesel, hydraulic oil, grease, penetrating oil, wire rope dressing, battery electrolyte, hand cleaner and shop degreaser - products operators and riggers actually touch on a lift. Manufacturer sheets for example products ship in the OH&S zip.

Rev 01 Effective 2026-09-01 Review 2027-09-01 Printed copy uncontrolled

Only what crews actually meet.

WHMIS PROGRAM

Workers have the right to know about products they use on the lift and on the carrier.

Labels stay on. If a product is decanted, it is identified.

SDS for the products below are in this library - no login, no expiring link. Download the OH&S zip for manufacturer PDFs you can sleeve behind Tab 18.

A product the site introduces is the site's SDS. Ask before you use it.

Spill, fire and first aid follow the SDS and the site emergency plan.

This is not a catalogue of construction chemicals. If the work does not use it, it is not in this library.
