

## HYDRAULIC OIL

Crane hydraulic systems. Leaks are a slip hazard and a fire hazard on hot surfaces. Operators report leaks; they do not ignore a wet boom pin.

Rev 01 Effective 2026-09-01 Review 2027-09-01 Printed copy uncontrolled

### HAZARDS

- Slippery surfaces
- Skin irritation
- High-pressure injection from pinhole leaks
- Smoke if it hits exhaust or brakes

### PPE

- Gloves
- Eye protection
- Do not check leaks with your hand

### SPILL

Contain. Absorb. Keep out of soil and drains. Tag the machine if the leak affects control.

### FIRST AID

Skin: wash. High-pressure injection is a medical emergency even if the hole looks small.

### STORAGE

Manufacturer reservoirs and approved drums. Caps on. Spill kit within reach of fuelling and service areas.

This is a field card for the lift. The manufacturer SDS for the exact product on site wins if it is stricter or more specific. Example manufacturer sheets sit in Manufacturer-SDS in this pack.
